SUMMARY

Proactive ECE student with hands on expertise in Linux administration, network security protocols, and Python automation. Technical troubleshooter passionate about resolving network/system anomalies and optimizing internal IT support desks for fast growing ecosystem.

EXPERIENCE

- **Internet Governance Intern (Focus: DNSSEC & Infrastructure Security)** (View Certificate)
National Internet Exchange of India (NIXI), New Delhi, MeitY, Govt. of India Oct 2025 – Dec 2025
 - Mastered core technical mechanisms of Internet Governance, regional routing architectures, and DNS infrastructure hierarchy.
 - Conducted extensive analytical research on validation issues and deployment bottlenecks of DNSSEC adoption across production DNS Resolvers in India.
- **Intern – Network Security, SAS Projects** (View Certificate)
National Centre for Communication Security, Bengaluru, DoT, Govt. of India July 2025 – Sept 2025
 - Collaborated on critical network security frameworks and programmed standalone Python tools to automate system compliance testing.
 - Successfully minimized protocol compliance verification and diagnostic turnaround times by approximately 55 percent.
 - Gained extensive exposure resolving infrastructure issues within complex enterprise networks and cybersecurity auditing landscapes.

EDUCATION

- **B.Tech in Electronics and Communication Engineering** CGPA: 7.42 / 10 (7th Sem Completed)
Gurukula Kangri (Deemed to be University), Haridwar, Uttarakhand Nov 2022 – July 2026 (Expected)

SKILLS

Operating Systems & Servers: Linux (Kali, Ubuntu), Windows (CMD, PowerShell), Apache and Nginx servers
Networking & Security: TCP/IP, DNS, DNSSEC, VPN, Firewalls, Wireshark, DHCP, Network Troubleshooting
Tools & Frameworks: Nmap, Testssl, Wireshark, Openssh, Burp Suite, OWASP ZAP, GitHub, VirtualBox.
Scripting & Automation: Python, Bash Scripting, AI-assisted development

PROJECTS

- **Cellular Security Monitoring & Diagnostics Device** Live Demo / other projects
Academic Engineering Project Python, Linux
 - Engineered a real time RF network tracking device deploying RTL-SDR hardware configurations alongside an active Raspberry Pi host node.
 - Implemented adaptive thresholding infrastructure with dynamic baseline calibration, significantly upgrading diagnostic detection accuracy.
 - Developed standalone background logging daemons with structured diagnostic data output and LCD modules for physical asset fault isolation.
- **Network Traffic Analyzer & Packet Sniffer** Live Demo / Repository
Independent Systems Project Python, Scapy
 - Developed a lightweight network packet sniffer capable of capturing and decoding real-time data frame layers (Ethernet, IP, TCP/UDP).
 - Implemented custom classification logic to filter and flag risky protocol flags and captured and analyzed 900+ packets.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- **Member & Active Volunteer** Community Engagement
Internet Society (ISOC) – Bengaluru Chapter Nov 2025 – Present
 - Actively engage with technical community leads to coordinate regional IT meetups, structural infrastructure development, and network security awareness initiatives.
- **Technical & Community Speaker** More Portfolio Details
Institutional Workshops & Outreach Nov 2025 – Dec 2025
 - Organized and hosted an infrastructure engineering workshop covering DNS architectures, IPv6 mechanics, and core systems protection workflows for 50+ engineers at Gurukula Kangri University.
 - Led a technical outreach seminar and diagnostic forum detailing common cyber attacks and digital responses for an audience of 80+ school students (9th Class) at Jawahar Novodaya Vidyalaya, Haridwar.
